FUND SUITABILITY

2. WHO IS THE PRODUCT SUITABLE FOR?

Refer to the “Information of the Fund” of the Prospectus.

The Fund is suitable for investors who:

- Have high risk tolerance.
- Have preference for capital appreciation.
- Have preference to have investment with global exposure.
- Understand the risks and returns profile of investing in local and global capital market.

KEY FUND FEATURES

Refer to the “Information of the Funds” of the Prospectus

3. WHAT ARE YOU INVESTING IN?

Refer to the “Fund Objective” in the “Information of the Fund” of the Prospectus.

You are investing in the Fund which seeks to provide investors with capital growth opportunities through investment in securities primarily in the global equity market.

Note: Any material changes to the investment objective of the Fund would require Unit Holders’ approval.

a) Investment Policies and Principal Investment Strategy

- The investment policy of the Fund is to invest primarily in a diversified portfolio of global equities that are listed in any Eligible Market approved by the relevant authorities. The Fund may also invest in the remaining in money market instruments and other securities, which may include fixed income securities, as permitted by the deed of the Fund that are issued and offered in any Eligible Market approved by the relevant authorities and/or issued by approved financial institutions globally.
- The Fund may adopt a defensive strategy depending on changes in economic and stock market conditions.
- In line with its objective, the investment strategy and policy of the Fund is to diversify among asset classes between equity and other instruments as permitted by the deed of the Fund, depending on the country’s economic situation, stock market conditions and interest rate movements. The Fund also emphasizes on investing in a mixed equity portfolio through sectoral allocation. This strategy is to minimise the volatility of the portfolio and generate competitive returns in the long-term.
- The Fund also adopts an active trading strategy through portfolio rebalancing depending on the expected risk and return on securities invested and changes in the market.

b) Asset Allocation Strategy

- The Fund will invest 75% to 99% of its NAV in global equities and equity-related securities, while the balance may be invested in money market and fixed income instruments.

c) Distribution Policy

- The distribution of income of the Fund is incidental and subject to the availability of income at the end of the financial year, after deducting expenses and taxation (if applicable) at the Manager’s discretion, subject to approval from the Trustee.

4. WHO ARE YOU INVESTING WITH?

The Manager of the Fund is ASNB, a wholly-owned subsidiary of PNB. ASNB was established on 22 May 1979 and has been in the industry for more than forty (40) years. ART acts as the Trustee to the Fund.

5. WHAT ARE THE POSSIBLE OUTCOMES OF YOUR INVESTMENT?

The Investment Manager of the Fund applies the appropriate investment strategy that is in line with the investment objective and risk profile of the Fund. The investment portfolio of the Fund is regularly reviewed and rebalanced in accordance with prevailing market conditions to ensure that the Fund could consistently meet its objective. The performance of the Fund is dependent on the performance of its underlying investments i.e .equities, fixed income securities, money market instruments as permitted by the deed of the Fund. The value of the investment of the Fund may go up as well as down depending on prevailing market and economic conditions.

Being a variable priced fund, the total returns to Unit Holders of the Fund will be in the form of capital return and income distribution yield (if any). The total returns of the Fund is benchmarked* against the 90% MSCI ACWI and 10% Maybank 1 month Fixed Deposit. Under worst economic and market downturn, the value of investment of the Fund may fall below the cost of investment.

*Note: *Prior 1 April 2023, the benchmark of the Fund is 90% MSCI ACWI and 10% Maybank 1 month Fixed Deposit. Effective from 1 April 2023, the benchmark of the Fund is 90% MSCI ACWI Islamic and 10% Maybank 1 month Fixed Deposit.*

KEY RISK
Refer to the “Potential risk associated with the Fund” of the Prospectus

6. WHAT ARE THE KEY RISKS ASSOCIATED WITH THIS PRODUCT?

Below are the risks associated in the product which may cause significant losses if they occur.

a) Capital Market Risk	<ul style="list-style-type: none"> • Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund’s NAV.
b) Country Risk	<ul style="list-style-type: none"> • The Fund may be affected by risks to the countries in which they invest. Such risks may be caused by but not limited to changes in the country’s economic fundamentals, social and political stability, currency movements and foreign investment policies. • To mitigate this risk the Investment Manager will conduct thorough research and analysis on the political and economic conditions of the country in which the Fund is invested and diversify its investments in various countries within the limits of the mandate.
c) Currency Risk	<ul style="list-style-type: none"> • If the Fund invests in foreign currency or asset denominated in foreign currency, the Fund may be exposed to currency fluctuation risk. Fluctuations in foreign exchange rates will affect the value of the Fund’s foreign investment upon conversion to Ringgit Malaysia and subsequently impact the value of the Unit Holders’ investment in the Fund. • To mitigate such risk, the Fund may undertake hedging strategies that are not speculative in nature, from time to time when deemed necessary.
d) Sector Specific Risk	<ul style="list-style-type: none"> • If the Fund invests in a specific sector, the Fund is vulnerable to factors associated with the particular sector it is invested in. Therefore, any material changes associated with the sector such as adverse developments in political, economic, competition and insurance coverage may have an adverse impact to the value of the Fund. • The Manager will take reasonable steps in ensuring the risk is managed by monitoring and determining effective asset allocation, adhering to the Fund’s investment objectives and investment restrictions and limits and escalating and reporting investment matters to the Investment Committee of the Fund.
e) Securities Specific Risk	<ul style="list-style-type: none"> • The price of particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund’s NAV. • The Manager will manage the risk by investing in securities within the approved investment limits across market sectors so that the volatility of the value of the investments could be mitigated. It can also be mitigated through having robust and disciplined valuation methodologies and adequate portfolio combination.

f) Concentration Risk	<ul style="list-style-type: none"> Concentration risk is the probability of loss arising from lack of diversification, investing too heavily in one industry, one geographic area or one type of security. The Fund is exposed to concentration risk when the Fund is concentrated to high levels of individual stock and sector exposures. Excessive concentration could also give rise to liquidity risk or stock specific risk losses. Concentration risk could be mitigated by investing into securities in different sectors or different geographical location within the approved limits. Although the Fund may have the ability to diversify, there may be circumstances that it may hold concentrated position. The risk could also be mitigated through close monitoring of investments in which exposure is deemed as highly concentrated.
g) Credit Risk / Default Risk	<ul style="list-style-type: none"> Credit risk relates to the creditworthiness of the issuers of the fixed income securities, money market instruments and derivatives and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income securities, money market instruments and derivatives. In the case of rated fixed income securities, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income security, money market instrument and derivatives either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income security, money market instrument and derivatives. This could adversely affect the value of the Fund. The Manager will take reasonable steps to ensure that the credit risk / default risk is managed by ensuring the Fund invests in fixed income securities, money market instruments and derivatives (for hedging purposes) issued by fundamentally strong issuers with good credit worthiness that can ensure timely payment of their obligations.
h) Interest Rate Risk	<ul style="list-style-type: none"> Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the Fund's investment in debt instruments. The reverse may apply when interest rates fall. In order to mitigate interest rate risk, the Manager will need to manage the debt portfolio taking into account the coupon rate and time to maturity of the debt instruments.

Investors are reminded that the above list of risks may not be exhaustive and if necessary, they should consult their adviser(s) e.g. their bankers, lawyers, stockbrokers or independent professional advisers for a better understanding of the risks.

10. BASIS OF CALCULATION AND ASSUMPTIONS IN CALCULATION OF RETURNS

1. Annualised return

$$= \left[\left[(1 + r_1) \times (1 + r_2) \times \dots \times (1 + r_n) \right]^{\frac{1}{n}} - 1 \right] \times 100$$

Whereby, r_i = annual return in year i , n = number of years

2. Annual total return

a. Capital return (%) = $\left[\left(\frac{\text{NAV per unit after income distribution}}{\text{NAV per unit beginning of the year}} \right) - 1 \right] \times 100$

b. Income Return (%) = $\left[\frac{\text{Income distribution per unit}}{\text{NAV per unit after income distribution}} \right] \times 100$

c. Total Return (%) = $\left[\left(1 + \frac{\text{Capital Return}}{100} \right) \times \left(1 + \frac{\text{Income Return}}{100} \right) - 1 \right] \times 100$
