STATEMENT OF DISCLAIMER

The Securities Commission Malaysia (SC) has authorized/recognized the issuance of ASN Sara 1 and a copy of this Product Highlights Sheet has been lodged with the Securities Commission Malaysia. The authorisation of ASN Sara 1 and lodgement of this Product Highlights Sheet, should not be taken to indicate that the Securities Commission Malaysia recommends ASN Sara 1 assumes responsibility for the correctness of any statement made or opinion or report expressed in this Product Highlights Sheet. The Securities Commission Malaysia is not liable for any non-disclosure on the part of Amanah Saham Nasional Berhad responsible for ASN Sara 1 and takes no responsibility for the contents of this Product Highlights Sheet. The Securities Commission Malaysia makes no representation on the accuracy or completeness of this Product Highlights Sheet, and expressly disclaims any liability whatsoever arising from, or in reliance upon, the whole or any part of its contents.

This Product Highlights Sheet only highlights the key features and risks of ASN Sara 1. Investors are advised to request, read and understand the Prospectus and its supplementary(ies) (if any) (hereinafter collectively referred to as "Prospectus") before deciding to invest. If in doubt, please consult a professional adviser.

ASN SARA (MIXED ASSET CONSERVATIVE) 1 ("ASN Sara 1")

BRIEF INFORMATION ON THE PRODUCT

1. WHAT IS THIS PRODUCT ABOUT?

Refer to the "Information of the Funds" of the Prospectus.

Fund Category	• Mixed Asset Conservative	Manager	• Amanah Saham Nasional Berhad (ASNB)
Fund Type	• Growth and Income	Trustee	• AmanahRaya Trustees Berhad (ART)
Launch Date	• 17 March 2003	Financial Year	• 31 March

PRODUCT SUITABILITY

2. WHO IS THE PRODUCT SUITABLE FOR?

Refer to the "Information of the Funds" of the Prospectus.

ASN SARA 1 is suitable for investors who:

- Have a long-term investment horizon.
- Understand investment risk and reward.
- Seek capital growth; and/or
- For those who:
 - Are self-employed and wish to have an avenue to save for their retirement, and/or
 - Already have retirement benefits but wish to have additional avenue for long-term saving in a Fund specifically meant to finance their retirement expenses, and/or
 - Wish to start long-term saving for the future retirement of their children or charges under their guardianship.

KEY PRODUCT FEATURES

3. WHAT ARE YOU INVESTING IN?

Refer to the "Fund Objective" in the "Information of the Funds" of the Prospectus.

You are investing in ASN Sara 1 which aims to provide investment opportunity, which generates reasonable long-term growth and returns, and a reliable income stream to enable the Unit Holders and/or their children and/or charges to meet part or all of their retirement needs.

Investment Policies and Principal Investment Strategy

Refer to the "Investment Strategy" in the "Information of the Funds" of the Prospectus.

- The investment policy of the Fund is to invest in a diversified portfolio of listed securities, primarily on the Bursa Malaysia, unlisted securities, fixed income and money market instruments. The Fund may adopt a defensive strategy depending on changes in economic and stock market conditions.
- The investment strategy and policy of the Fund is to diversify among asset classes between equity, fixed income instruments and other instruments depending on the country's economic situation, stock market conditions and interest rate movements in order to minimize the volatility of the portfolio. Further diversification shall be achieved by investing across various sectors depending on economic cycles.
- In order to meet the Fund objectives of providing Unit Holders with periodic liquidity requirements, the funds will have a sizeable exposure towards fixed income instruments to generate competitive returns in the long-term and to provide a steady income stream.
- The Fund also adopts an active trading strategy through portfolio rebalancing depending on the expected risk and return on securities invested and changes in the market.

Policies on Cross Trades

- Cross trade between the Fund and other funds managed by PNB may be undertaken provided that all criteria imposed by the regulators are met. PNB has been granted exemptions from compliance with clauses of the Guidelines on Compliance Functions for Fund Management Companies and the Licensing Handbook in relations to cross trade between PNB and the funds under its management.
- All cross trades executed are reported to the Investment Committee of the respective fund and disclosed in the Fund's report.

Asset Allocation Strategy

The Fund seeks to achieve its objective by investing:

- Between 20% to 80% of its NAV in equities;
- the remaining in fixed income securities, money market instruments and other capital market instruments inclusive of liquid assets.

Income Distribution Policy

- ASN Sara 1 will distribute earnings from its income, if any, to the Unit Holders, at the Manager's discretion, subject to approval from the Trustee.

4. WHO ARE YOU INVESTING WITH?

The Manager of ASN Sara 1 is ASNB, a wholly-owned subsidiary company of Permodalan Nasional Berhad (PNB). ASNB was established on 22 May 1979, to manage the funds launched by PNB. ART acts as the Trustee to ASN Sara 1.

5. WHAT ARE THE POSSIBLE OUTCOMES OF YOUR INVESTMENT?

The investment Manager of ASN Sara 1 applies the appropriate investment strategy that is in line with the investment objective and risk profile of ASN Sara 1. The investment portfolio of ASN Sara 1 is regularly reviewed and rebalanced in accordance with prevailing market conditions to ensure that the fund could consistently meets its objective. The performance of ASN Sara 1 is dependant on the performance of its underlying investments i.e. equities, fixed income instruments and money market instruments. The value of the investment ASN Sara 1 may go up as well as go down depending on prevailing market and economic conditions.

Being a variable-priced fund, the return to Unit Holders of ASN Sara 1 will be in the form of total return that comprises of capital return and income distribution yield (if any). The total return of ASN Sara 1 is benchmarked against 30% FBM 100 and 70% Maybank 12 months fixed deposit. Under a worst economic and market downturn, the value of investment of ASN Sara 1 may fall below the cost of investment of Unit Holders of ASN Sara 1.

KEY RISKS

6. WHAT ARE THE KEY RISKS ASSOCIATED WITH THIS PRODUCT?

Below are the risks associated in the product which may cause significant losses if they occur.

Capital Market Risk	<ul style="list-style-type: none">• Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's Net Asset Value ("NAV").
Credit Risk / Default Risk	<ul style="list-style-type: none">• Credit risk relates to the creditworthiness of the issuers of the fixed income securities and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income instruments. In the case of rated fixed income securities, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income security either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income security. This could adversely affect the value of the Fund.• The Manager will take reasonable steps to ensure that the credit risk/default risk is managed by ensuring the Funds invest in fixed income securities issued by fundamentally strong issuers with good credit worthiness that can ensure timely payment of their obligations.

Unlisted Security Risk	<ul style="list-style-type: none"> The risk refers to investment in securities that are not listed on a securities exchange such as share of unlisted companies. The Fund may face liquidity risk on the deposits of unlisted securities which could affect the value of the Fund. The risk can be mitigated through a thorough investment evaluation process performed on the unlisted securities prior to investment decisions.
Sector Specific Risk	<ul style="list-style-type: none"> If the Funds invest in a specific sector, the Funds are vulnerable to factors associated with the particular sector it is invested in. Therefore, any material changes associated with the sector such as adverse developments in political, economic, competition and insurance coverage may have an adverse impact to the value of the Funds. The Manager will take reasonable steps in ensuring the risk is managed by monitoring and determining effective asset allocation, adhering to the Funds' investment objectives and investment restrictions and limits and escalating and reporting investment matters to the Investment Committee of the Fund.
Securities Specific Risk	<ul style="list-style-type: none"> Price of particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV. The Manager will manage the risk by investing in securities within the approved investment limits across asset classes and market sectors so that the volatility of the value of the investments could be mitigated. It can also be mitigated through having robust and disciplined valuation methodologies and adequate portfolio combination.
Interest Rate Risk	<ul style="list-style-type: none"> Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the Fund's investment in debt instruments. The reverse may apply when interest rates fall. In order to mitigate interest rate risk, the Manager will need to manage the debt portfolio taking into account the coupon rate and time to maturity of the debt instruments.
Concentration Risk	<ul style="list-style-type: none"> Concentration risk is the probability of loss arising from lack of diversification, investing too heavily in one industry, one geographic area or one type of security. Funds are exposed to concentration risk when Funds are concentrated to high levels of individual stock and sector exposures. Excessive concentration could also give rise to liquidity risk or stock specific risk losses. Concentration risk could be mitigated by investing into different asset classes and securities in different sectors or different geographical location within the approved limits. Although the Funds may have the ability to diversify, there may be circumstances that it may hold concentrated position. The risk could also be mitigated through close monitoring of investments in which exposure is deemed as highly concentrated.
Derivative Risk	<ul style="list-style-type: none"> The Fund may invest in the derivative mainly for hedging and to a lower extent for investment purposes. The derivatives are highly volatile instruments and their market values may be subject to wide fluctuations and expose the Fund to potential gains or losses due to mark-to-market value. The value of such derivatives depends on a variety of market factors, including improvements in the underlying reference index, the variability or volatility of such index, interest rate, foreign exchange rate and other factors. The value may not necessarily change in constant to changes in the underlying reference index.
Structured Product Risk	<ul style="list-style-type: none"> The Fund may also invest structured product which are designed as a hold-to-maturity investment. Therefore, the early repurchase amount may be lesser than the principal amount originally invested or part thereof, in the case of partial repurchase. Any request to restructure the structured products, if agreed by the issuer, is effectively an early repurchase by the Fund. The full amount that would have been received is used to invest in a new investment on such terms that are applicable to the new movement, break cost and other losses incurred in discharging a related hedging or other arrangements made in the design of the structured product.

The following risks are the additional risks associated with investments in overseas market.

Country Risk	<ul style="list-style-type: none"> The Funds may be affected by risks to the countries in which they invest. Such risks may be caused by but not limited to changes in the country's economic Fundamentals, social and political stability, currency movements and foreign investment policies. To mitigate this risk the investment Manager will conduct thorough research and analysis on the political and economic conditions of the country in which the Fund is invested and diversify its investments in various countries within the limits of the mandate.
Currency Risk	<ul style="list-style-type: none"> If the Fund invests in foreign currency or asset denominated in foreign currency, the Fund may be exposed to currency fluctuation risk. Fluctuations in foreign exchange rates will affect the value of the Fund's foreign investment upon conversion to Ringgit Malaysia and subsequently impact the value of the Unit Holders' investment in the Fund. To mitigate such risk, the Fund may undertake hedging strategies that are not speculative in nature, from time to time when deemed necessary.

Investors are reminded that the above list of risk may not be exhaustive and if necessary, they should consult their adviser(s) e.g. their bankers, lawyers, stockbrokers or independent professional advisers for a better understanding of the risks.

e) Portfolio Turnover Ratio

	Financial year ended 31 March		
	2019	2018	2017
PTR (times)	0.43	0.62	0.59

2018-2019: Lower acquisition and disposal of investment

BASIS OF CALCULATION AND ASSUMPTIONS IN CALCULATION OF RETURNS

1. Annualised return

$$= \left[(1 + r_1) \times (1 + r_2) \times \dots \times (1 + r_n) \right]^{\frac{1}{n}} - 1 \times 100$$

Whereby, r = annual return n = number of years

2. Annual total return

$$a. \text{ Capital return (\%)} = \left[\left(\frac{\text{NAV per unit after income distribution}}{\text{NAV per unit beginning of the year}} \right) - 1 \right] \times 100$$

$$b. \text{ Income Return (\%)} = \left[\frac{\text{Income distribution per unit}}{\text{NAV per unit after income distribution}} \right] \times 100$$

$$c. \text{ Total Return (\%)} = \left[\left(1 + \frac{\text{Capital Return}}{100} \right) \times \left(1 + \frac{\text{Income Return}}{100} \right) - 1 \right] \times 100$$

PAST PERFORMANCE OF THE FUND IS NOT AN INDICATION OF ITS FUTURE PERFORMANCE
