Under worst economic and market downturn, the value of investment of ASN Imbang 3 Global may fall below the cost of investment

#### **KEY RISK**

**Refer to the “Potential risk associated with the Fund” of the Prospectus**

#### **6. WHAT ARE THE KEY RISKS ASSOCIATED WITH THIS FUND?**

Below are the risks associated in the fund which may cause significant losses if they occur.

<b>Capital Market Risk</b>	<ul style="list-style-type: none"> <li>▪ Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.</li> </ul>
<b>Sector Specific Risk</b>	<ul style="list-style-type: none"> <li>▪ If a Fund invests in a specific sector, the Fund is vulnerable to factors associated with the particular sector. Therefore, any material changes associated with the sector such as adverse developments in political, economic, competition and insurance coverage may have an adverse impact on the value of the Funds.</li> <li>▪ The Manager will take reasonable steps in ensuring the risk is managed by monitoring and determining effective asset allocation, adhering to the Fund's investment objectives and investment restrictions and limits and escalating and reporting investment matters to the Investment Committee of the Fund.</li> </ul>
<b>Securities Specific Risk</b>	<ul style="list-style-type: none"> <li>▪ The price of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger, or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.</li> <li>▪ The Manager will manage the risk by investing in securities within the approved investment limits across asset classes and market sectors so that the volatility of the value of the investments could be mitigated. It can also be mitigated through having robust and disciplined valuation methodologies and adequate portfolio combinations.</li> </ul>

<b>Concentration Risk</b>	<ul style="list-style-type: none"> <li>■ Concentration risk is the probability of loss arising from lack of diversification, investing too heavily in one industry, one geographic area or one type of security. The Fund is exposed to concentration risk when the Fund is concentrated to high levels of individual stock and sector exposures. Excessive concentration could also give rise to liquidity risk or stock specific risk losses.</li> <li>■ Concentration risk could be mitigated by investing into different asset classes and securities in different sectors or different geographical locations within the approved limits. Although the Fund may have the ability to diversify, there may be circumstances that it may hold a concentrated position. The risk could also be mitigated through close monitoring of investments in which exposure is deemed as highly concentrated.</li> </ul>
<b>Interest Rate Risk</b>	<ul style="list-style-type: none"> <li>■ Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of a fund's investment in debt instruments. The reverse may apply when interest rates fall.</li> <li>■ In order to mitigate interest rate risk, the Manager will need to manage the debt portfolio taking into account the coupon rate and time to maturity of the debt instruments.</li> </ul>
<b>Credit Risk / Default Risk</b>	<ul style="list-style-type: none"> <li>■ Credit risk relates to the creditworthiness of the issuers of the fixed income securities and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as the liquidity of the fixed income instruments. In the case of rated fixed income securities, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income security either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income security. This could adversely affect the value of the Fund.</li> <li>■ The Manager will take reasonable steps to ensure that the credit risk/default risk is managed by ensuring the Fund invests in fixed income securities issued by fundamentally strong issuers with good creditworthiness that can ensure timely payment of their obligations</li> </ul>
The following risks are the additional risks associated with investments in overseas market.	
<b>Country Risk</b>	<ul style="list-style-type: none"> <li>■ The Fund may be affected by risks to the countries in which they invest. Such risks may be caused by but not limited to changes in the country's economic fundamentals, social and political stability, currency movements and foreign investment policies.</li> <li>■ To mitigate this risk the Investment Manager will conduct thorough research and analysis on the political and economic conditions of the country in which the Fund is invested and diversify its investments in various countries within the limits of the mandate.</li> </ul>
<b>Currency Risk</b>	<ul style="list-style-type: none"> <li>■ If the Fund invests in foreign currency or asset denominated in foreign currency, the Fund may be exposed to currency fluctuation risk. Fluctuations in foreign exchange rates will affect the value of the Fund's foreign investment upon conversion to Ringgit Malaysia and subsequently impact the value of the Unit Holders' investment in the Fund.</li> <li>■ To mitigate such risk, the Fund may undertake hedging strategies that are not speculative in nature, from time to time when deemed necessary</li> </ul>

*Investors are reminded that the above list of risk may not be exhaustive and if necessary, they should consult their adviser(s) e.g. their bankers, lawyers, stockbrokers or independent professional advisers for a better understanding of the risks.*
