Where a distribution is declared, investors are advised that following the distribution, the NAV per unit will be reduced from cum-distribution NAV to ex-distribution NAV.

Based on the Fund's portfolio returns as at 31 July 2024, the Volatility Factor (VF) for this Fund is 6.4 and is classified as "Low" (source: Novagmi). "Low" includes funds with VF that are above 4.785 but not more than 8.795. The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
