3.2 POLICY ON GEARING

Save and except where permitted or approved by SC, the Fund is prohibited from gearing or borrowing cash or other assets (including the borrowing of securities) to finance the purchase of investments.

3.3 POTENTIAL RISKS ASSOCIATED WITH THE FUND

At all times, the Fund is subject to some risks. Many factors influence the performance of the Fund, including the capability of the Investment Manager. No matter how experienced the Investment Manager may be, some factors which affect the value of investments may be beyond its control. It is important to note that investors should be prepared to accept a degree of risk. The risks are as stated in Section 3.3.3

3.3.1 Control of Risks

The Manager will take reasonable steps to ensure that the above potential risks are managed by:

- Continuous monitoring of factors that could affect market and liquidity, including but not limited to economics, countries, industries and companies' news and performance, as well as investors sentiment;
- Determining the optimal asset allocation and portfolio duration strategy;
- Adhering to the Fund's investment objectives and investment restrictions and limits on the concentration of investments; and
- Effective portfolio investment risk monitoring via a clear governance structure and escalation procedures

Note: Prior to making an investment, prospective investors should consider the following risk factors in addition to the other information set out in this Prospectus.

3.3.2 General Risks of Investing in Unit Trust Funds

Manager's Risk	➤ This risk refers to the day-to-day management of the fund by the Manager which will impact the performance of the fund. For example, investment decisions undertaken by the Investment Manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
Liquidity Risk	➤ Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices. ➤ The risk can be mitigated by actively managing asset allocation of the Fund and maintaining a sufficient level of liquid assets to meet anticipated payments and cancellation of Units by Unit Holders. <i>Note: This risk disclosure may not be applicable to all types of assets. Some assets do not qualify under this risk disclosure. For example, deposits are not traded in the market.</i>
Inflation / Purchasing Power Risk	➤ This is the risk that investors' investment in the Unit trust fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce investors' purchasing power even though the value of the investment in monetary terms has increased.
Loan Financing Risk	➤ The risk occurs when a unit holder takes loan financing provided by a financial institution to finance the purchase of units. Investing in a fund using borrowed money is riskier than investing using a Unit Holder's own money. The inherent risk of investing with borrowed money includes the ability to service loan repayments if the return from the investment in a unit trust fund is not commensurate with the interest expenses of the loan. Similarly, if the Units are collateralized against the loan, the Unit Holder may lose the Units if he is unable to service the loan.
Non-Compliance Risk	➤ The operations and administration of a fund are governed by the Deed and all applicable laws and regulations. Non-adherence may potentially affect the performance of the Fund. ➤ The risk is mitigated by imposing stringent internal controls and ensuring that compliance monitoring is undertaken through regular audit and cross-departmental checking.

Operational Risk	➤ The risk of loss to unit holders arising from inadequacies in, or failures of, our internal procedures and controls for monitoring and quantifying the risks and contractual obligations associated with investments in a Fund. ➤ Although the occurrence of such events is very unlikely, the Manager seeks to mitigate the risk through the establishment of systematic operational procedures and stringent internal controls.
Force Majeure Risk	➤ It is the risk that there will be an event beyond the control of the Manager, which prevents the Manager from complying with any of its obligations under this Prospectus, including but not limited to: a) acts of God (such as but not limited to, fires, explosions, earthworks, drought, tidal waves and floods); b) war, hostilities (whether war be declared or not), invasion, an act of foreign enemies, mobilization, requisition, embargo, rebellion, revolution, insurrection or military or usurped power or civil war; c) contamination by radioactivity from any nuclear fuel, or from any nuclear waste from the combustion of nuclear fuel, radio-active toxic explosive, or other hazardous properties of any explosive nuclear assembly or nuclear component of such assembly; d) riot, commotion, strikes, go-slows, lockouts or disorder unless restricted to employees of the Manager; e) acts or threats of terrorism; and f) any other emergency circumstances that materially and adversely prevent the Manager from operating normally. ➤ The Manager will undertake appropriate action to mitigate the risk which among others includes insurance coverage and alternate recourse to resume operations in the event of the above-mentioned risk.

3.3.3 Specific Risks of Investing In the Fund

Capital Market Risk	➤ Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
Credit Risk / Default Risk	➤ Credit risk relates to the creditworthiness of the issuers of the fixed income securities and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as the liquidity of the fixed income instruments. In the case of rated fixed income securities, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of fixed income security either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income security. This could adversely affect the value of the Fund.

	➤ The Manager will take reasonable steps to ensure that the credit risk/default risk is managed by ensuring the Fund invests in fixed income securities issued by fundamentally strong issuers with good creditworthiness that can ensure timely payment of their obligations.
Interest Rate Risk	➤ Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of a fund's investment in debt instruments. The reverse may apply when interest rates fall. ➤ In order to mitigate interest rate risk, the Manager will need to manage the debt portfolio taking into account the coupon rate and time to maturity of the debt instruments.
Sector Specific Risk	➤ If a fund invests in a specific sector, the fund is vulnerable to factors associated with the particular sector. Therefore, any material changes associated with the sector such as adverse developments in political, economic, competition and insurance coverage may have an adverse impact on the value of the Funds. ➤ The Manager will take reasonable steps in ensuring the risk is managed by monitoring and determining effective asset allocation, adhering to the Fund's investment objectives and investment restrictions and limits and escalating and reporting investment matters to the Investment Committee of the Fund.
Securities Specific Risk	➤ The price of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger, or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV. ➤ The Manager will manage the risk by investing in securities within the approved investment limits across asset classes and market sectors so that the volatility of the value of the investments could be mitigated. It can also be mitigated through having robust and disciplined valuation methodologies and adequate portfolio combinations.
Concentration Risk	➤ Concentration risk is the probability of loss arising from lack of diversification, investing too heavily in one industry, one geographic area or one type of security. The Fund is exposed to concentration risk when the Fund is concentrated on high levels of individual stock and sector exposures. Excessive concentration could also give rise to liquidity risk or stock specific risk losses. ➤ Concentration risk could be mitigated by investing in different asset classes and securities in different sectors or different geographical locations within the approved limits. Although the Fund may have the ability to diversify, there may be circumstances that it may hold a concentrated position. The

	risk could also be mitigated through close monitoring of investments in which exposure is deemed as highly concentrated.
The following risks are the additional risks associated with investments in the overseas market.	
Country Risk	➤ The Fund may be affected by risks to the countries in which they invest. Such risks may be caused by but not limited to changes in the country's economic fundamentals, social and political stability, currency movements and foreign investment policies. ➤ To mitigate this risk the Investment Manager will conduct thorough research and analysis on the political and economic conditions of the country in which the Fund is invested and diversify its investments in various countries within the limits of the mandate.
Currency Risk	➤ If the Fund invests in foreign currency or assets denominated in foreign currency, the Fund may be exposed to currency fluctuation risk. Fluctuations in foreign exchange rates will affect the value of the Fund's foreign investment upon conversion to Ringgit Malaysia and subsequently impact the value of the Unit Holders' investment in the Fund. ➤ To mitigate such risk, the Fund may undertake hedging strategies that are not speculative in nature, from time to time when deemed necessary.

These risks are reported to the relevant committees of the Board of Directors of PNB and ASNB on a regular basis.

Investors are reminded that the above list of risk may not be exhaustive and if necessary, they should consult their adviser(s), e.g. their bankers, lawyers, stockbrokers or independent professional advisers for a better understanding of the risks.

5.2 BASIS OF VALUATION FOR INVESTMENTS

Types	Valuation
Listed Securities and Fixed Income Securities	➤ Valuation is conducted at the end of each Business Day based on the last done market price primarily listed on the Bursa Malaysia or any Eligible Market approved by the relevant authorities. ➤ Suspended securities will be valued at their last done price unless there is conclusive evidence to show that the value has gone below the suspended price, then the securities should be valued at fair value as determined in good faith by the Manager based on the methods or bases approved by the Trustee after appropriate technical consultation. ➤ If no market price is available or valuation based on market price does not represent the fair value of investments, for example during abnormal market conditions, the securities will be valued based on methods deemed to be fair and reasonable as agreed upon by the Manager and Trustee after appropriate technical consultation.
Unlisted Fixed Income Securities and Debt Securities	➤ Unlisted bonds/sukuk denominated in Ringgit Malaysia (RM) are stated at the indicative market value quoted by a Bond Pricing Agency (BPA) registered with the SC. Where the Manager is of the view that the price quoted by BPA for a specific bond differs from the “market price” by more than 20 basis points, the Manager may use the “market price”, provided that the Manager:- (i) records its basis for using a non-BPA price; (ii) obtains necessary internal approvals to use the non-BPA price; and (iii) keep an audit trail of all decisions and basis for adopting the “market yield”. ➤ Investments in unlisted bonds/sukuk denominated in foreign currencies are valued daily using the Bloomberg Generic Price (BGN price) provided by Bloomberg. In the event the price of a bond/sukuk is not available on Bloomberg or being marked and “not priced” for a particular date/period, ASNB will use the last available price from Bloomberg or assign a fair value determined in good faith by the management company or fund manager, on methods or bases which have been verified by the auditor of the fund and approved by the trustee and adequately disclosed in the Prospectus.
Unlisted Collective Investment Scheme	➤ Valuation is based on the last published repurchase price.
Other Unlisted Securities	➤ Valuation is based on methods deemed fair and reasonable, determined by the Manager, verified by the Auditors and approved by the Trustee.
Money Market Instruments	➤ Valuation of tradeable money market instruments shall be determined each day by reference to the principal value of such authorised investments and the accrued income for the relevant period.
Deposits with Financial Institutions	➤ The value of any deposits placed with financial institutions shall be determined each day by reference to the principal value of the deposits and the accrued income thereon for the relevant period.

Foreign Exchange Rate Conversion

- Where the value of an asset of the Fund is denominated in a foreign currency, the assets are translated on a daily basis to Ringgit Malaysia using the bid foreign exchange rate quoted by either Reuters or Bloomberg, in United Kingdom time 4.00 p.m. the same day.

5.3 VALUATION POINTS FOR THE PURPOSE OF DETERMINING THE NAV OF THE FUND

The Fund will be valued at least once every Business Day. The Fund adopts a Forward Pricing basis which means that prices of Units will be calculated based on the NAV of the Fund at the next Valuation Point after the application to purchase or redeem Units is received by the Manager.

As the Fund will invest in foreign markets, the valuation of the Fund is conducted after 5.00 p.m. of the following Business Day (T+1) due to the different time zones of foreign markets. Consequently, the daily NAV of the Fund will be published two (2) Business Days later instead of the next Business Day.

If the application for purchase or repurchase is received by the Manager before the Cut-Off time of 4.00 p.m. on any Business Day, say, Tuesday, then Tuesday's Unit pricing shall apply and will be calculated after 5.00 p.m. on Wednesday (if Wednesday is a Business Day). Tuesday's Unit pricing will be published on Thursday (T+2).

Unit Holder may contact ASNB directly or visit our website at www.asnb.com.my to obtain the latest NAV of the Fund.

5.4 NAV PER UNIT

NAV per Unit is determined based on Forward Pricing and calculated at the next valuation point after instruction or a request is received by the Manager.

The valuation of Units is based on the NAV of the Fund. The NAV per Unit of the Fund is calculated by dividing the Fund's NAV by the number of UIC, rounded to four (4) decimal places. The NAV per Unit forms the basis for the computation of the Unit price.

Illustration:

Computation of the NAV per Unit at each valuation point is illustrated below:

	<u>RM</u>
Quoted Investments	231,000,000
Liquid Assets	34,500,000
Other Assets	6,100,000
	271,600,000
Less: Liabilities	(16,500,000)
NAV	255,100,000
 Units in Circulation (Units)	 326,500,000
Net Asset Value per Unit	NAV
	= Units in circulation
	= RM255,100,000
	= 326,500,000 Units
	= RM0.781317
NAV per Unit, rounded to four (4) decimal places	= <u>RM0.7813</u>

The rounding up of the NAV per Unit will be up to four (4) decimal places. The total amount paid will be subject to the rounding mechanism. Please note that the example above is for illustrative purposes only.

5.5 BASIS OF CALCULATIONS AND ASSUMPTIONS IN CALCULATION OF RETURNS

The following are the basis of calculation and the assumptions made in calculating the returns:

- (a) Annualised returns for the Fund is derived by the rate of returns on an annual basis over the entire period of investment.

The formula for annualised return is as follows:

$$\left[\left\{ [(1 + r_1)(1 + r_2) \dots (1 + r_n)]^{\frac{1}{n}} \right\} - 1 \right] \times 100$$

Whereby, r = annual return n = number of years

- (b) The annual total return for the Fund is computed as follows:

i. Capital Return (%):

$$\left[\left(\frac{\text{NAV per Unit after income distribution}}{\text{NAV per Unit beginning of the year}} \right) - 1 \right] \times 100$$

ii. Income Return (%):

$$\left(\frac{\text{Income Distribution per unit}}{\text{NAV per Unit after income distribution}} \right) \times 100$$

iii. Total Return (%):

$$\left[\left\{ \left[1 + \left(\frac{\text{Capital Return}}{100} \right) \right] \times \left[1 + \left(\frac{\text{Income Return}}{100} \right) \right] \right\} - 1 \right] \times 100$$

Please visit our website at www.asnb.com.my for the latest updates on the Fund's performance. Past performance of the Fund is not an indication of future performance.

5.6 PRICING OF UNITS

The price of Units of the Fund is based on the NAV per unit that is determined based on Forward Pricing.

5.6.1 Forward Pricing for both Purchase and Repurchase Transaction

Both purchase and repurchase transactions are based on Forward Pricing. A request issued today by Unit Holder to purchase units of the Fund will be carried out at a next determined price i.e. the transaction will be calculated at the next valuation point after the application to purchase Units is received and accepted by the Manager. Similarly, a request to repurchase of Units by Unit Holder will be done at the next determined price i.e. the transaction will be executed at the next valuation point after the application to repurchase request is received by the Manager.

Any transaction over the counter through ASNB's branches or agents on any Business Day will be processed based on the price determined for the same Business Day. Transaction via electronic channel before or at 4.00 p.m. on any Business Day will be processed on the price determined for the same day; whilst transaction after 4.00 p.m. via these channels will be processed based on the price determined for the next Business Day will be treated as transactions made on the following Business Day.

5.6.2 Incorrect Pricing

If there is any incorrect calculation of NAV per Unit, the Manager will take immediate remedial action to rectify the error. The Manager's remedial action will extend to the reimbursement of money to the Unit Holder if the error:

- a) is at or above the threshold of 0.5% of the NAV per Unit; and
- b) results in a sum of RM10.00 or more to be reimbursed to the affected Unit Holder for each purchase or repurchase transaction.

Subject to any regulatory requirements, the Manager shall have the right to amend, vary and revise the above-said limits or threshold from time to time.

5.7 COMPUTATION OF PRICE

5.7.1 Single Pricing Policy

The Manager adopts the single pricing policy in calculating Unit Holder's investment and repurchase of Units. "Single pricing" which equates to sales and repurchases quoted and transacted on a single price (i.e. NAV per Unit), is easier to understand and facilitate investors in comparing the different charges imposed and assist investors in making an informed decision about their choice of investment products.

Under the single pricing policy, the selling price for Units of the Fund is the NAV per Unit. However, Unit Holder will be imposed a sales charge for investing in the Fund. The basis of calculation is Forward Pricing. Sales charge of up to 4.0% of the NAV per Unit will be added as part of the purchase cost. Tax on the sales charge may be added as part of the purchase cost.

A. Making an Investment

Units are transacted at the NAV per Unit of the Fund based on Forward Pricing. Upon the purchase of Units of the Fund, a sales charge of up to 4.0% of NAV per Unit is levied.

Illustration: Investment/Subscription of Units

If Unit Holder submit an application to invest RM10,000 in ASN Imbang 3 Global

Assuming the amount Unit Holder wish to invest ("investment amount")	:	RM10,000
NAV per Unit	:	RM0.5000
Sales charge	:	4.0%
Tax, (if applicable)	:	Zero-rated or any rate imposed by the Government.
(i) Purchase price per Unit	=	NAV per Unit + Sales charge of 4% + Tax charge of 0%
	=	RM0.5000 + RM0.020 + RM0.00
	=	RM0.5200 per Unit
(ii) Units issued to Unit Holder	=	RM10,000 / RM0.5200
	=	<u>19,230.77 Units</u>

The rounding up of the NAV per Unit will be up to four (4) decimal places. The total amount paid will be subject to the rounding mechanism. Please note that the example above is for illustrative purposes only.

B. Requesting for Repurchase of Units

Unit Holder may request for repurchase of Units by simply completing the repurchase form. There is no restriction on the frequency of repurchase.

Illustration: Repurchase of Investment

The NAV is RM0.5000 per Unit. No repurchase charge will be imposed. If Unit Holder submit an application to repurchase 10,000 Units in ASN Imbang 3 Global:

Assuming the amount Unit Holder wish to repurchase	:	RM10,000 in ASN Imbang 3 Global
NAV per Unit	:	RM0.5000
Repurchase charge	:	Nil
(i) Repurchase Units	=	Amount paid / NAV per Unit
	=	RM10,000 / RM0.5000
	=	20,000 Units
(ii) Net Repurchase Proceeds	=	Amount repurchased – Repurchase charge
	=	RM 10,000 – RM0
		<u>RM10,000</u>

The rounding up of the NAV per Unit will be up to four (4) decimal places. The total amount paid will be subject to the rounding mechanism. Please note that the example above is for illustrative purposes only.

Dear Sirs

Taxation of the Unit trust and Unit holders

This letter has been prepared for inclusion in this Prospectus in connection with the offer of Units in the Unit trust known as ASN Imbang 3 Global (hereinafter referred to as "the Fund").

The purpose of this letter is to provide prospective Unit holders with an overview of the impact of taxation on the Fund and the Unit holders.

Taxation of the Fund

The taxation of the Fund is subject to the provisions of the Malaysian Income Tax Act 1967 ("MITA"), particularly Sections 61 and 63B.

Subject to certain exemptions, the income of the Fund comprising interest and other investment income derived from or accruing in Malaysia after deducting tax allowable expenses, is subject to Malaysian income tax, which is currently imposed at the rate of 24% with effect from the year of assessment 2016.

Tax allowable expenses would comprise expenses falling under Section 33(1) and Section 63B of the MITA. Section 33(1) permits a deduction for expenses that are wholly and exclusively incurred in the production of gross income. In addition, Section 63B allows Unit trusts a deduction for a portion of other expenses (referred to as 'permitted expenses') not directly related to the production of income, as explained below.

"Permitted expenses" refer to the following expenses incurred by the Fund which are not deductible under Section 33(1) of the MITA:

- the manager's remuneration,
- maintenance of the register of Unit holders,
- share registration expenses,
- secretarial, audit and accounting fees, telephone charges, printing and stationery costs and postage.

These expenses are given a partial deduction under Section 63B of the MITA, based on the following formula:

$$A \times \frac{B}{4C}$$

- Where,
- A is the total of the permitted expenses incurred for that basis period;
 - B is gross income consisting of dividend¹, interest and rent chargeable to tax for that basis period; and
 - C is the aggregate of the gross income consisting of dividend² and interest (whether such dividend or interest is exempt or not) and rent, and gains made from the realisation of investments (whether chargeable to tax or not) for that basis period,

provided that the amount of deduction to be made shall not be less than 10% of the total permitted expenses incurred for that basis period.

Exempt income

The following income of the Fund is exempt from income tax:

- **Malaysian sourced dividends**
All Malaysian-sourced dividends should be exempt from income tax.
- **Malaysian sourced interest**
 - (i) interest from securities or bonds issued or guaranteed by the Government of Malaysia;
 - (ii) interest from debentures or *sukuk*, other than convertible loan stock, approved or authorized by, or lodged with, the Securities Commission;
 - (iii) interest from Bon Simpanan Malaysia issued by Bank Negara Malaysia;
 - (iv) interest derived from Malaysia and paid or credited by banks licensed under the Financial Services Act 2013 or the Islamic Financial Services Act 2013²;
 - (v) interest derived from Malaysia and paid or credited by any development financial institution prescribed under the Development Financial Institutions Act 2002²;
 - (vi) interest from *sukuk* originating from Malaysia, other than convertible loan stock, issued in any currency other than Ringgit and approved or authorized by, or lodged with, the Securities Commission or approved by the Labuan Financial Services Authority (LFSA)³; and
 - (vii) interest which is specifically exempted by way of statutory orders or any other specific exemption provided by the Minister.
- **Discount**
Tax exemption is given on discount paid or credited to any Unit trust in respect of investments as specified in items (i), (ii) and (iii) above.

¹ Pursuant to Section 15 of the Finance Act 2011, with effect from the year of assessment 2011, dividend income is deemed to include income distributed by a Unit trust which includes distributions from Real Estate Investment Trusts.

² Effective from the year of assessment 2017, in the case of a wholesale fund which is a money market fund, the exemption shall only apply to a wholesale fund which complies with the criteria as set out in the relevant guidelines of the Securities Commission Malaysia.

³ Effective from the year of assessment 2017, the exemption shall not apply to interest paid or credited to a company in the same group or interest paid or credited to a bank licensed under the Financial Services Act 2013 or the Islamic Financial Services Act 2013; or a development financial institution prescribed under the Development Financial Institutions Act 2002.

Foreign sourced income

Dividends, interest and other income derived from sources outside Malaysia and received in Malaysia by a resident Unit trust is exempt from Malaysian income tax. However, such income may be subject to tax in the country from which it is derived.

Gains from the realisation of investments

Pursuant to Section 61(1) (b) of the MITA, gains from the realisation of investments will not be treated as income of the Fund and hence, are not subject to income tax. Such gains may be subject to real property gains tax ("RPGT") under the Real Property Gains Tax Act 1976 ("RPGT Act"), if the gains are derived from the sale of chargeable assets, as defined in the RPGT Act.

Taxation of Unit holders

For Malaysian income tax purposes, Unit holders will be taxed on their share of the distributions received from the Fund.

The income of Unit holders from their investment in the Fund broadly falls under the following categories:

1. taxable distributions; and
2. non-taxable and exempt distributions.

In addition, Unit holders may also realise a gain from the sale of Units.

The tax implications of each of the above categories are explained below:

1. Taxable distributions

Distributions received from the Fund will have to be grossed up to take into account the underlying tax paid by the Fund and the Unit holder will be taxed on the grossed up amount.

Such distributions carry a tax credit, which will be available for set-off against any Malaysian income tax payable by the Unit holder. Should the tax deducted at source exceed the tax liability of the Unit holder, the excess is refundable to the Unit holder.

Please refer to the paragraph below for the income tax rates applicable to the grossed up distributions.

2. Non-taxable and exempt distributions

Tax exempt distributions made out of gains from the realisation of investments and exempt income earned by the Fund will not be subject to Malaysian income tax in the hands of the Unit holders.

Rates of tax

The Malaysian income tax chargeable on the Unit holders would depend on their tax residence status and whether they are individuals, corporations or trust bodies. The relevant income tax rates are as follows:

Unit holders	Malaysian income tax rates
