FUND SUITABILITY

2. WHO IS THE FUND SUITABLE FOR?

ASB 2 is suitable for investors with the following profile:

- Understand investment risk and return.
- Seeking a fund with potential annual yield.

KEY FUND FEATURES

Refer to the "Information of the Funds" of the Prospectus.

3. WHAT ARE YOU INVESTING IN?

Refer to the "Fund Objective" in the "Information of the Funds" of the Prospectus

You are investing in ASB 2 which seeks to provide regular income stream whilst preserving the Unit Holder's investment capital through a mixed asset portfolio.

Note:

- ASB 2 is a fixed price Fund and it is not a capital guaranteed or capital protected fund under the Guidelines.
 - Any material changes to the investment objective of the Fund would require Unit Holders' approval.
- a) Investment Policies and Principal Investment Strategy
- The investment policy of ASB 2 is to invest in a mixed asset portfolio within the approved investment limits of equities, variable and fixed income securities, money market instruments as well as other securities in Malaysia, and/or any Eligible Market as permitted in the Deed of ASB 2. ASB 2 also may invest up to 20% of its VOF in real estate or beneficial ownership in real estate, subject to approval from the SC.
 - To achieve the Fund's objective of providing regular income, the Fund will be invested in a mixed portfolio through asset allocation in equities, variable and fixed income securities, real estate and other securities as permitted by the Deed, depending on the country's relevant fundamental factors.
 - The Fund also adopts an active trading strategy through portfolio rebalancing depending on the expected risk and return on securities invested and changes in the market.
- b) Asset Allocation Strategy
- The Fund seeks to achieve its objective by investing
 - Up to 90% of VOF in equities.
 - Up to 50% of VOF in other asset classes.
 - Minimum 5% of VOF in cash or liquid asset.

c) Income Distribution Policy

- The Fund will distribute earnings from its income, if any, to the Unit Holders, at the Manager's discretion, subject to approval from the Trustee.

4. WHO ARE YOU INVESTING WITH?

- The Manager of ASB 2 is ASNB, a wholly-owned subsidiary company of Permodalan Nasional Berhad (PNB). ASNB was established on 22 May 1979, to manage the funds launched by PNB. ART acts as the Trustee to ASB 2.

5. WHAT ARE THE POSSIBLE OUTCOMES OF YOUR INVESTMENT?

The investment Manager of ASB 2 applies conservative investment strategy while regularly reviewing and rebalancing the investment portfolio in accordance with prevailing market conditions, in order to achieve the objective of the ASB 2. The return of investment of ASB 2 is depending upon the performance of its underlying investments, i.e. equities, other asset classes and cash or liquid asset.

Being a fixed price fund, the return to Unit Holders of ASB 2 will be in the form of income distribution that is benchmarked against the Maybank 12 months fixed deposit rates. However, the rate of income distribution may go up as well as down and is not guaranteed as it depends on the realized gain generated by ASB 2, which in turn depends on prevailing market and economic conditions. Under a worst market and economic downturn, ASB 2 may not generate sufficient realized gain to distribute its income to Unit Holders.

KEY RISK

Refer to the "Potential risk associated with the Fund" of the Prospectus

6. WHAT ARE THE KEY RISKS ASSOCIATED WITH THIS FUND?

Below are the risks associated in the fund which may cause significant losses if they occur

a) Capital Market Risk	<ul style="list-style-type: none"> • Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's Net Asset Value ("NAV").
b) Sector Specific Risk	<ul style="list-style-type: none"> • If the Funds invest in a specific sector, the Funds are vulnerable to factors associated with the particular sector it is invested in. Therefore, any material changes associated with the sector such as adverse developments in political, economic, competition and insurance coverage may have an adverse impact to the value of the Funds. • The Manager will take reasonable steps in ensuring the risk is managed by monitoring and determining effective asset allocation, adhering to the Fund's investment objectives and investment restrictions and limits and escalating and reporting investment matters to the Investment Committee of the Fund.
c) Securities Specific Risk	<ul style="list-style-type: none"> • Price of particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the fund's NAV. • The Manager will manage the risk by investing in securities within the approved investment limits across asset classes and market sectors so that the volatility of the value of the investments could be mitigated. It can also be mitigated through having robust and disciplined valuation methodologies and adequate portfolio combination.
d) Concentration Risk	<ul style="list-style-type: none"> • Concentration risk is the probability of loss arising from lack of diversification, investing too heavily in one industry, one geographic area or one type of security. Funds are exposed to concentration risk when Funds are concentrated to high levels of individual stock and sector exposures. Excessive concentration could also give rise to liquidity risk or stock specific risk losses. • Concentration risk could be mitigated by investing into different asset classes and securities in different sectors or different geographical location within the approved limits. Although the Fund may have the ability to

	<p>diversify, there may be circumstances that it may hold concentrated position. The risk could also be mitigated through close monitoring of investments in which exposure is deemed as highly concentrated.</p>
e) Interest Rate Risk	<ul style="list-style-type: none"> Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the fund's investment in debt instruments. The reverse may apply when interest rates fall. In order to mitigate interest rate risk, the Manager will need to manage the debt portfolio taking into account the coupon rate and time to maturity of the debt instruments. The Manager will take reasonable steps in ensuring the risk is managed by monitoring and determining effective asset allocation, adhering to the Fund's investment objectives and investment restrictions and limits and escalating and reporting investment matters to the Investment Committee of the Fund.
f) Credit Risk / Default Risk	<ul style="list-style-type: none"> Credit risk relates to the creditworthiness of the issuers of the fixed income securities and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income instruments. In the case of rated fixed income securities, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income security either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income security. This could adversely affect the value of the fund. The Manager will take reasonable steps to ensure that the credit risk/default risk is managed by ensuring the funds invest in fixed income securities issued by fundamentally strong issuers with good credit worthiness that can ensure timely payment of their obligations.
g) Unlisted Security Risk	<ul style="list-style-type: none"> The risk refers to investment in securities that are not listed on a securities exchange such as share of unlisted companies. The Fund may face liquidity risk on the deposits of unlisted securities which could affect the value of the Fund. The risk can be mitigated through a thorough investment evaluation process performed on the unlisted securities prior to investment decisions.
h) Derivative Risk	<ul style="list-style-type: none"> The Fund may invest in derivatives mainly for hedging and to a lower extent for investment purposes. The price of derivatives depends on a variety of market factors, including the price and volatility of the underlying asset, interest rate, foreign exchange rate and others. Market values of derivatives may be subject to wide fluctuations and expose the Fund to potential gains or losses.
<p>The following risks are the additional risks associated with investments in overseas market.</p>	
i) Country Risk	<ul style="list-style-type: none"> The Funds may be affected by risks to the countries in which they invest. Such risks may be caused by but not limited to changes in the country's economic fundamentals, social and political stability, currency movements and foreign investment policies. To mitigate this risk the investment Manager will conduct thorough research and analysis on the political and economic conditions of the country in which the Fund is invested and diversify its investments in various countries within the limits of the mandate
j) Currency Risk	<ul style="list-style-type: none"> If the Fund invests in foreign currency or asset denominated in foreign currency, the Fund may be exposed to currency fluctuation risk. Fluctuations in foreign exchange rates will affect the value of the Fund's foreign investment upon conversion to Ringgit Malaysia and subsequently impact the value of the Unit Holders' investment in the Fund. To mitigate such risk, the Fund may undertake hedging strategies that are not speculative in nature, from time to time when deemed necessary.

Investors are reminded that the above list of risks may not be exhaustive and if necessary, they should consult their adviser(s) e.g. their bankers, lawyers, stockbrokers or independent professional advisers for a better understanding of the risks.
