ASM 2 Wawasan

BRIEF INFORMATION ON THE FUND

(For further details of the Fund, kindly refer to the latest prospectus available in the ASNB website.)

1. WHAT IS THIS PRODUCT ABOUT?

Refer to the “Information of the Funds” of the Prospectus.

Fund Category	• Mixed Asset	Manager	• Amanah Saham Nasional Berhad (ASNB)
Fund Type	• Income	Trustee	• AmanahRaya Trustees Berhad (ART)
Launch Date	• 28 August 1996	Financial Year End	• 31 August

FUND SUITABILITY

2. WHO IS THE PRODUCT SUITABLE FOR?

Refer to the “Information of the Funds” of the Prospectus.

The Fund is suitable for investors with the following profile:

- Understand investment risk and reward.
- Expect to benefit from long-term growth of the Fund through re-investment of distribution (if any) as well as to receive regular income (if any) on their capital.

KEY FUND FEATURES

Refer to the “Information of the Funds” of the Prospectus

3. WHAT ARE YOU INVESTING IN?

Refer to the “Fund Objective” in the “Information of the Funds” of the Prospectus.

You are investing in the Fund which seeks to provide a reasonable level of regular distribution income to Unit Holders from investments in a selected portfolio of authorised investments.

Notes:

- **The Fund is a fixed price fund and it is not a capital guaranteed or capital protected fund under the Guidelines.**
- **Any material changes to the investment objective of the Fund would require Unit Holders’ approval.**

(a) Investment Policies and Principal Investment Strategy

- The investment policy of the Fund is to invest in a portfolio of various asset classes, primarily securities listed on the Bursa Malaysia, unlisted securities, fixed income and money market instruments.
- The Fund may invest in unrated corporate bonds as permitted by the deed of the Fund.
- The Fund may adopt a defensive strategy depending on changes in economic and stock market conditions.
- In line with its objective, the investment strategy and policy of the Fund is to invest in a portfolio of various asset classes between equity and other instruments depending on the country’s economic situation, stock market conditions and interest rate movements. The Fund also emphasizes on investing in diversified portfolio through sectoral allocation. The strategy is to preserve* the value of the capital and generate competitive returns in the long-term.
- The Fund also adopts an active trading strategy through portfolio rebalancing depending on the expected risk and return on securities invested and changes in the market.
- The Fund may participate in the lending of securities, (effective from 1st February 2024) within the meaning of the Guidelines on SBL issued by the SC.

Note: *The Fund is not a capital guaranteed or capital protected fund under the Guidelines.

(b) Asset Allocation Strategy

The Fund seeks to achieve its objective by investing:

- Up to 90% of VOF in equities.
- Up to 50% of VOF in other asset classes.
- Minimum 5% of VOF in cash or liquid asset.

(c) Distribution Policy

- The Fund will distribute earnings from its income, if any, to the Unit Holders, at the Manager’s discretion, subject to approval from the Trustee.

4. WHO ARE YOU INVESTING WITH?

The Manager of the Fund is ASNB, a wholly-owned subsidiary of PNB. ASNB was established on 22 May 1979 and has been in the industry for more than forty (40) years. ART acts as the Trustee to the Fund.

5. WHAT ARE THE POSSIBLE OUTCOMES OF YOUR INVESTMENT?

The Investment Manager of the Fund applies conservative investment strategy while regularly reviewing and rebalancing the investment portfolio in accordance with prevailing market conditions, in order to achieve the objective of the Fund. The return of investment of the Fund is depending upon the performance of its underlying investments, i.e. equities, other asset classes and cash or liquid assets.

Being a fixed-priced fund the return to Unit Holders of the Fund will be in the form of income distribution that is benchmarked against the Maybank 12 months Fixed Deposit. However, the rate of income distribution may go up as well as down and is not guaranteed as it depends on the realised gain generated by the Fund, which in turn depends on prevailing market and economic conditions. Under a worst market and economic downturn, the Fund may not generate sufficient realised gain to distribute its income to Unit Holders.

KEY RISK

Refer to the “Potential risk associated with the Fund” of the Prospectus

6. WHAT ARE THE KEY RISKS ASSOCIATED WITH THIS PRODUCT?

Below are the risks associated in the product which may cause significant losses if they occur.

a) Capital Risk	Market Risk	<ul style="list-style-type: none"> Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
b) Sector Risk	Specific Risk	<ul style="list-style-type: none"> If the Fund invests in a specific sector, the Fund is vulnerable to factors associated with the particular sector it is invested in. Therefore, any material changes associated with the sector such as adverse developments in political, economic, competition and insurance coverage may have an adverse impact to the value of the Fund. The Manager will take reasonable steps in ensuring the risk is managed by monitoring and determining effective asset allocation, adhering to the Fund's investment objectives and investment restrictions and limits and escalating and reporting investment matters to the Investment Committee of the Fund.
c) Securities Specific Risk		<ul style="list-style-type: none"> Price of particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV. The Manager will manage the risk by investing in securities within the approved investment limits across asset classes and market sectors so that the volatility of the value of the investments could be mitigated. It can also be mitigated through having robust and disciplined valuation methodologies and adequate portfolio combination.
d) Concentration Risk		<ul style="list-style-type: none"> Concentration risk is the probability of loss arising from lack of diversification, investing too heavily in one industry, one geographic area or one type of security. The Fund is exposed to concentration risk when the Fund is concentrated to high levels of individual stock and sector exposures. Excessive concentration could also give rise to liquidity risk or stock specific risk losses. Concentration risk could be mitigated by investing into different asset classes and securities in different sectors or different geographical location within the approved limits. Although the Fund may have the ability to diversify, there may be circumstances that it may hold concentrated position. The risk could also be mitigated through close monitoring of investments in which exposure is deemed as highly concentrated.
e) Interest Rate Risk		<ul style="list-style-type: none"> Interest rate risk refers to the impact of interest rate changes on the valuation of debt instruments. When interest rates rise, debt instruments prices generally decline and this may lower the market value of the Fund's investment in debt instruments. The reverse may apply when interest rates fall. In order to mitigate interest rate risk, the Manager will need to manage the debt portfolio taking into account the coupon rate and time to maturity of the debt instruments.
f) Credit Risk / Default Risk		<ul style="list-style-type: none"> Credit risk relates to the creditworthiness of the issuers of the fixed income securities and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income instruments. In the case of rated fixed income securities, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income security either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income security. This could adversely affect the value of the Fund. The Manager will take reasonable steps to ensure that the credit risk / default risk is managed by ensuring the Fund invests in fixed income securities issued by fundamentally strong issuers with good credit worthiness that can ensure timely payment of their obligations.
g) Unlisted Security Risk		<ul style="list-style-type: none"> The risk refers to investment in securities that are not listed on a securities exchange such as share of unlisted companies. The Fund may face liquidity risk on the deposits of unlisted securities which could affect the value of the Fund. The risk can be mitigated through a thorough investment evaluation process performed on the unlisted securities prior to investment decisions.
h) Derivative Risk		<ul style="list-style-type: none"> The Fund may invest in derivatives mainly for hedging and to a lower extent for investment purposes. The price of derivatives depends on a variety of market factors, including the price and volatility of the underlying asset, interest rate, foreign exchange rate and others. Market values of derivatives may be subject to wide fluctuations and expose the Fund to potential gains or losses.
The following risks are the additional risks associated with investments in overseas market.		
i) Country Risk		<ul style="list-style-type: none"> The Fund may be affected by risks to the countries in which they invest. Such risks may be caused by but not limited to changes in the country's economic fundamentals, social and political stability, currency movements and foreign investment policies.

	<ul style="list-style-type: none"> To mitigate this risk, the Investment Manager will conduct thorough research and analysis on the political and economic conditions of the country in which the Fund is invested and diversify its investments in various countries within the limits of the mandate. 																																										
j) Currency Risk	<ul style="list-style-type: none"> If the Fund invests in foreign currency or asset denominated in foreign currency, the Fund may be exposed to currency fluctuation risk. Fluctuations in foreign exchange rates will affect the value of the Fund's foreign investment upon conversion to Ringgit Malaysia and subsequently impact the value of the Unit Holders' investment in the Fund. To mitigate such risk, the Fund may undertake hedging strategies that are not speculative in nature, from time to time when deemed necessary. 																																										
The following risks are the additional risks associated with investments in equity and fixed income SBL.
